Navigator Bulletin 05-004

July 7, 2005

Navigator RIP with Macintosh OS 10.4 (Tiger) Compatibility

Apple recently began shipments of the Mac OS 10.4 (Tiger) with all new computers. The Navigator RIP is compatible and operates properly under this new release as a TIFF RIP. However, the current hardware device drivers are not compatible with the Tiger release. The preferred Mac OS for use with current drivers is 10.3.7.

Our developer of the Mac RIP drivers is working to update and release new drivers, which will be compatible with 10.4. Until that time, please be advised that customers must use Mac OS 10.3.7 when purchasing a Navigator Mac RIP with an interface board. Again, Navigator Mac TIFF RIPs are compatible with Mac OS 10.4.

If you have any questions, please contact your Xitron Dealer Manager or Xitron Help.

A handwritten signature in black ink that reads "Bill". The signature is written in a cursive, slightly slanted style.
